
ADVANCED WEBSITE PROGRAMMING

Homework 1

Open project made on laboratories and following object oriented project scenario from materials, handle CRUD operations for database table provided below. Make views designed by your idea, but similar to those from scenario. Remember to implement foreign key connection. On all view display name of the internal event connected with foreign key constraint.

```
create table Tasks
(
    Id int AUTO_INCREMENT primary key,
    Title varchar(64) not null,
    IsDone bit not null,
    StartDateTime datetime not null,
    Description text not null,
    Deadline datetime not null,
    InternalEventId int not null ,
    CreationDateTime datetime not null,
    EditDateTime datetime not null,
    Notes text,
    IsActive bit not null,
    foreign key (InternalEventId) references InternalEvents (Id)
);
```
